

THANUSHREE UPPOOR

AI Platform Experience

Technical Product Manager | AI, ML & LLM Platforms
Bengaluru, India | uthanushree@gmail.com | +91 96866 23194
LinkedIn: <https://www.linkedin.com/in/thanushree-uppoor>

Senior Technical Product Manager with experience leading enterprise AI platforms, developer platforms, and data products at Nike. I work closely with engineering, data science, and leadership teams to translate complex technical capabilities into scalable products with measurable business outcomes.

PLATFORM EXPERIENCE

AirTalk — Enterprise Conversational AI

Architecture: RAG architecture, prompt/retrieval experimentation with 12+ engineers & data scientists.

Outcomes: 65% fewer queries; 12s→3s response; 85% satisfaction; FCR 45%→72%.

AI Cost Intelligence & Governance

Architecture: Databricks + MLflow platform; model evaluation, deployment gating, observability, AI PDLC.

Outcomes: \$2.44M opportunity identified; \$133K Q1 savings; 50–70% token reduction; \$3M+ funding.

Platform Console — Developer Marketplace

Architecture: Unified 15+ tools via API-first architecture and micro-frontends; global self-service onboarding.

Outcomes: \$6.5M savings; \$5M TCO reduction; 92% engineering adoption.

Nike Insights Marketplace — Data Platform

Architecture: Federated data marketplace (SOA); 30+ discovery interviews; ML-powered recommendations.

Outcomes: \$4M+ productivity opportunity; executive sponsorship; 50+ early users.

TECHNICAL EXPERTISE

AI/ML: RAG, LLMs, LangGraph, retrieval pipelines, model evaluation, AI governance | **Platforms:** Databricks, MLflow, AWS | **Architecture:** APIs, microservices, SOA, micro-frontends | **Observability:** New Relic, OpenTelemetry

BUSINESS IMPACT & RELEVANCE TO AGODA

Impact: \$12.7M+ business value delivered across enterprise platforms; 2,000+ global engineering users | 10,000+ retail users | 5 enterprise platforms. **Relevance:** Experience bridging engineering, data science, product, and executive stakeholders to define AI platform strategy, make architecture and technology trade-offs, establish evaluation and governance practices, improve platform adoption and reliability, and connect technical investments to measurable business value.

Thanks, Thanushree Upoor
